

Sleek and Stylish.

Haas Door introduces a new window option, SlimLine. This long, narrow window adds a sleek and contemporary look and feel to our window offerings. The long length of the window allows plenty of light into the garage but the shorter height assists with privacy. It is a perfect option for the popular placement of windows aligned down one side of the garage door. SlimLine is available in SelectView and has the same glass options as Carriage House, Standard, and Ranch.
